

Alg 2 Syllabus

Textbook: Holt Algebra 2 copyright 2007
ISBN # 0-03-038531-8

Textbook offered on line as well with district code and password.

This eleventh grade course is designed to investigate a more in depth look at Functions. Our goal in this class to prepare our students for success in their state Algebra 2 assessment, as well as for upper level math classes like Trig and College Algebra.

The areas that we will be focusing on will be :

- 1) Quadratics Functions
- 2) Polynomial Functions
- 3) Linear Functions
- 4) Solving systems of multi equations and inequalities
- 5) Rational and Radical Functions
- 6) Probability and Statistics

We also have our ongoing goal to send productive young people out in the real world prepared to contribute. Therefore the students will be graded on daily work and assignments, quizzes and tests, as well as participation and citizenship. To help make this happen, the classroom expectations are:

- 1) In seat on time with work out ready to go
- 2) Quietly paying attention to speaker
- 3) Bring all materials daily
- 4) Work completed on time
- 5) Behavior that helps learning environment
- 6) District approved devices and drinks only

Please feel free to contact me with any questions or concerns.
