

ANATOMY & PHYSIOLOGY

Course Information:

- Number of semesters: Two
- TIME:
- Course credit: 1
- Open to grades: 11 & 12
- Prerequisites: None
- Instructors: Mr. Williamson
- Grading Scale: Standard High School Scale

Course Description:

This course is a detailed study of the structure and function of the human body. The systems of the body will be extensively studied. Lab work, including some dissections, will be an integral part of the course work. This course requires effort and is highly recommended for students considering a medically related career.

Topics:

- Levels of organization
- Biochemistry
- Cell structure and function
- Body tissues
- Ten systems of the body in regards to structure and function

Expectations:

Students are expected to exhibit a positive attitude and not interfere with the learning process.
